B.
24 April 1988, Warsaw

ADDRESS
Łódź, ul. Milionowa 243, Poland

Employment or B2B · remote PL / EU
Registered sole proprietorship — B2B-ready (often preferred by companies)

SKILLS

AI & automation

- AI agents
- Prompt engineering
- n8n · ExoVault · MCP · API
- AI audits
- Multi-agent

Development

- React · Next.js · TypeScript
- Python · Tailwind
- No-code + AI
- Docker · Git

Production · soft

- Social media automation
- Video pipeline
- Client communication
- Deployments · training

Languages

- Polish — native
- English — B1/B2 (fluent with technical documentation, conversational spoken)

PROFESSIONAL PROFILE

I audit and automate business processes with AI — apps, integrations and solutions that remove repetitive work. I design AI-agent systems, automations (n8n, Python, MCP) and social media pipelines. Audit → prototype → deployment. Business background: 3 years in premium customer service (Domoteka showroom) plus stage experience (theatre, film, workshops) help me translate technology into business language. Open to employment or B2B — registered sole proprietorship. Remote · PL/EU.

EXPERIENCE

Co-founder · Asistel

2026 – present

AI platform for pharmacies and multi-branch companies (asistel.pl) — 3-person experienced team

- Product, AI layer (dialog, tickets) and client communication; team and process management panel
- Asistel PWA: speech-to-text voice notes — one-tap recording, saved as text; pharmacists work hands-free
- Voice agent handling calls — code review and shared approval in the team

Founder & AI Solutions Builder · LEV

2025 – present

Independent practice — AI solutions for business

- Audit → prototype → deployment: automations, apps, websites, API integrations
- ExoVault (exovault.co) as a work tool: encrypted AI agent memory, task organization and team communication
- Social media automation, team training

SELECTED PROJECTS

Asistel — AI platform for pharmacies and multi-branch companies, co-created in a 3-person team: AI voice agent handling calls, PWA with speech-to-text notes, team & process management panel

Studio AI — End-to-end video production pipeline: script → voiceover (TTS, forced alignment) → illustrations → editing and publishing (Python, ffmpeg, Claude agents, n8n; ExoVault as agent-team memory and task board)

Organizacja Myśląca (Thinking Organization) — Decision-support system based on systems thinking (Senge): ladder of inference, dialogue vs. discussion, system archetypes — prototyping the tool with AI agents

maciejvsufa.pl — Next.js portfolio (PL/EN), Lighthouse 99+

EDUCATION · CERTIFICATE

Warsaw Film School (WSF) — acting (2008–2010), higher education

AI Skills for Tomorrow — Using AI in Business Development (2025)

Google & SGH (Warsaw School of Economics) — Practical Google & SGH program: AI in productivity, marketing, sales, analytics and AI agents; AI implementation leadership
